

BLUE FLAME STOVES™

HIGH QUALITY COOKSTOVES POWERED BY CLEAN BIOETHANOL FUEL

DOUBLE BURNER - Model DB202

The patented Blue Flame Stoves Double Burner is a safe, clean burning and durable ethanol cookstove. The unique burning technology produces negligible soot and particles. The stove is designed to address the problems caused by cooking over wood and charcoal indoors - the results of which are over 3.8 million deaths worldwide each year, and rapid deforestation. More than 55 000 of our stoves have been distributed under the SAFI brand, and the quality of the stoves has been proven in daily use, in tough conditions since 2014.

The integrated windshields of the improved DB202 model ensure effective cooking in exposed conditions. The windshields also shield the user from open flames and enhance the safety aspects of cooking by surrounding the pots (up to 25cm in diameter) and keeping them in place. Larger pots with more than 25 cm diameter and larger pans are placed on the pot support above the windshield.

The pot supports are solid and removable for cleaning. The fuel canisters slide out for easy refilling and are filled with mineral wool for safe fuel retention. The mineral wool can be replaced to extend the life of the canisters. Regulators are used to adjust the flame. Rubber feet keep the cookstove stable.

Model:	DB202 - Double burner	Stove weight:	4.8kg (incl. 2 x canisters)
Power (High)*:	1.6kW	Efficiency*:	Greater than 65%
Power (Low)*:	0.3kW	Emissions*:	Negligible soot and CO emissions
Canister capacity*:	1.2 litres		Emissions below WHO standards
Cooking time:	1L = 5+hrs(avg of High/Low pwr)	Dimensions:	70.2 x 31.8 x 15.6cm
Cooking capacity*:	0.75L = 3 meals for 5-7 people	Stove life time:	5 to 10 years expected
Max. pot size*:	15L / 20kg	Warranty:	Stove 3 years / Canister 1 year
Fuel required:	Ethanol / Bioethanol	Colours:	Blue (other colors depend on qty)
Canister weight:	0.7kg empty, 1.65kg full		

* Per burner
